

Water Chemistry

The following information is provided for the purpose of determining the chemical composition of the water sample. The following information is provided for the purpose of determining the chemical composition of the water sample. The following information is provided for the purpose of determining the chemical composition of the water sample.

Monday - This day by the water do not forget to check the water quality

The following information is provided for the purpose of determining the chemical composition of the water sample. The following information is provided for the purpose of determining the chemical composition of the water sample. The following information is provided for the purpose of determining the chemical composition of the water sample.

Phosphorus (P)	Copper (Cu)	Magnesium (Mg)
Potassium (K)	Cadmium (Cd)	Boron (B)
Calcium (Ca)	Iron (Fe)	Molybdenum (Mo)
Aluminum (Al)	Zinc (Zn)	Silica (Si)
Chromium (Cr)	Sodium (Na)	
Anions:		
Chloride (Cl)	Nitrate (NO ₃)	Sulfate (SO ₄)
Fluoride (F)	Phosphate (PO ₄)	

Soluble Salts (Electrical Conductivity/Specific Conductance)

Alkalinity (bicarbonate) and/or Free Carbon Dioxide
